## **SELF-TAPPING, SELF-SEALING FASTENERS**

APM HEXSEAL is pleased to announce the addition of self-tapping screws to their growing family of reusable self-sealing fasteners.

Each pre-assembled stainless-steel SEELSKREW™ features a resilient silicone rubber O-ring held captive in a precision-engineered sealing groove. Other sealing materials, including Viton, Buna, and Fluorosilicone, are available.

Installed like a conventional screw, it provides an absolute watertight seal that meets NEMA submersible standards. These self-tapping designs are ideal for sealing portable electronic instruments, gauges, fluid housings, cabinets and other plastic enclosures.

SEELSKREWS™ are offered in slotted or Phillips pan head styles, thread sizes of #2 through 1/4", and lengths to 1". Special options include a black-anodized finish.

SEELSKREWS™ are available from stock beginning at \$0.14 each in 5,000 quantity. For complete technical information and free samples, write or call APM HEXSEAL CORPORATION, 44 Honeck Street, Englewood, NJ 07631. Telephone: (201) 569-5700. FAX: (201) 569-4106. Web: [www.apmhexseal.com](http://www.apmhexseal.com).
