## DID YOU KNOW?

Today, more efficient and less expensive solar panels are dominating the Green Power revolution around the world. Advanced photovoltaic technology and improved manufacturing automation are bringing solar panel prices down to compete with fossil fuels. APM's stainless steel, self-sealing SEELSKREWS are holding some of these panels together. Thousands are mounted daily by leading solar panel manufacturers for environmental protection, protecting these Green systems against water, ice, dust, and dirt penetration. SEELSKREWS are also being installed on LED lighting enclosures to seal and prevent contamination from penetrating and coating LED lens and support circuitry... another environmentally Green application.

## DID YOU KNOW?

HEXSEAL silicone sealing boots hermetically block contaminants from reaching the control's internal operating mechanism. Catastrophic failure from foreign matter seepage: water, dust, dirt, lubricants cleaning solvents and even spilled liquids are prevented. APM offers a wide variety of boots (toggle, push button, rocker, rotary and lever) matched to most popular switches and breakers - there are hundreds of part numbers to choose from.

APM also offers EMI/RFI suppression and stainless steel armored versions for rugged applications. All meet MIL-DTL-5423 specs. APM will also custom design single piece panel solutions.

For more than half a century, APM has been the leader in developing and patenting this technology, originally for the military. Now millions of HEXSEAL boots can be found throughout the world protecting marine, medical, construction, automotive, electronics, test, and communications equipment of all

kinds.

## APM NEWS

Unlike liquid or gel anaerobic adhesives and threadlockers, all APM thread-locking enhancements are reusable and adjustable. APM self sealing fasteners with optional thread locking is a clean, dry system.

It's green. No chemical fumes for employees to inhale and no environmental disposal issues.

**Look for next week's newsletter to learn more about APM Hexseal's sealing solutions!**
