## APM Hexseal and Tel-Aviv, Israel Doing it Right Together

**New-Tech**  
Exhibition 2015

**2015**  
The Hi-Tech and Electronics International  
Exhibition  
The Israel Trade Fairs Center in Tel-Aviv  
19-20.5.2015

APM Hexseal will exhibit in **Tel-Aviv** and host at the **New-Tech Exhibition** May 20, 2015.

Register for a unique seminar May 20th, at the New-Tech Exhibition on protecting your controls & machinery from environment attack

## APM Hexseal Does it Again!

### Patents were recently granted to APM Hexseal for their design and manufacture of Full and Half Toggle Environmental Sealing Boots

There are an increasing number of breakers/switches that, when covered with an environmental sealing switch cover automatically trip the breaker switch into the off position due to the mere physics of being covered by the wrong type of cover. APM Hexseal's "Ultra Flex Series" with a bellow design alleviates this problem.

**Do It Right the First Time with APM Hexseal**

APM Hexseal designs and manufactures the world's most complete line of sealing devices to protect equipment from external attack by rain, snow, salt water, dust, oil and more.

APM introduced the first "boots" over 65 years ago to protect toggle, pushbutton, rotary and rocker style switches and circuit breakers.

UL Component Recognized, they seal the panel-mounted device and the mounting hole.

And don't forget the APM range of sealing hardware: screws, bolts, nuts and washers. They withstand up to 20,000psi of pressure and are used for a wide variety of applications, from assembling equipment to be watertight to sealing valves to keep in petroleum fluids.

APM Hexseal sealing devices provide the life-extending insurance that every switch, circuit breaker and related equipment needs. APM's boots and sealing hardware will reduce maintenance and improve reliability.

Contact Air & Marine Products today for information, pricing and to arrange for free samples to qualified customers:
