APM NEWS

APM HEXSEAL NEW WEBSITE: THE WORLD OF SELF-SEALING RIGHT AT YOUR FINGERTIPS

It's now easier than ever to navigate our website!
Some of the new features include:

- **Easy search feature:** Search as before by part number, manufacturer switch compatibility and now NSN cross reference or just type in your keyword.
- **Step-by-step ordering:** Easy instructions on how to place an order.
- **Installation instructions:** All in one place with multilingual versions available.
- **Multi navigation:** Navigation on top, drill down the side, all in an effort to get you there fast!
- **Important links:** Client Login, Search, Social media, all on top and ready to click.
- **Rep/Distributor search:** Finding product has never been easier with drop-down menus by state or company and for US and international.
- **Easy cross reference:** Finding your part has never been easier with the cross-reference search. NSN

ASK APM

DOES APM HAVE ANY FASTENERS THAT CAN BE USED FOR SHEET METAL ASSEMBLY?

APM [SEELSKREWS®](#) work amazingly well for sheet-metal assembly. Each pre-assembled stainless-steel SEELSKREW® features a resilient silicone rubber O-ring held captive in a precision-engineered sealing groove.

Other sealing materials are available for specific applications. A special self-tapping SEELSKREW® can be made to order per the customer's requirements. The self-tapping design is ideal for sealing portable electronic instruments, cabinets, enclosures, and other sheet metal assemblies. Installed like a conventional screw; it provides an absolute watertight seal that meets UL and NEMA submersible standards.

APM's standard SEELSKREWS® are offered in slotted or Phillips pan head style, thread sizes of #2 through 1/4 inch and M2 through M6. Visit our website for the [standard lengths available](#). Other thread sizes, lengths, head styles, self-tapping and finishes are available on special order.

Look for next week's newsletter to learn more about APM Hexseal's sealing solutions!
