DID YOU KNOW?

YACHTING AND MARINE INDUSTRY TRUST APM HEXSEAL SEALING BOOTS

The marine industry would not trust their carriers, their competition-grade yachts, their shipments, their diving teams with anything less than APM quality sealing boots.

Using advanced elastomeric molding technology, a broad range of sealing boots are produced by APM which seals switches and circuit breakers from salt water and the environment on board a ship. Most are IP66/68 ingress protection rated and have an operational life in

excess of 100,000 actuations, and are UL Recognized. APM sealing products act really as body armor for switches and are used extensively in the marine industry, Naval and in many other industries worldwide.

APM's custom molded dynamic elastomeric seals are designed to transmit mechanical energy, either internally or externally applied, depending on your application and environmental challenges. They flex and move without degradation or sealing compromise. Static sealing solutions too - anything requiring either heat transfer or injection molding. Please submit your design requirements and we'll rapidly respond with a cost-effective solution and quote.

A large advertisement for APM Hexseal. The background is a vibrant blue with a textured, water-like surface. Several hexagonal seals in various colors (red, yellow, green, white, black, blue) are scattered across the scene. The text "The Wetter The Better" is written in large, bold, yellow letters at the top. At the bottom, the APM Hexseal logo is displayed in orange and black, with the phone number "800.498.9034" and the website "apmhexseal.com" to its right. Below the logo, the tagline "The World's Most Hostile Environments Are Our Proving Grounds" is written in a smaller, black font.

Look for next week's newsletter to learn more about APM Hexseal's sealing solutions!
