## DID YOU KNOW?

### APM can provide custom Sealing Solutions!

When you need a unique sealing solution, you couldn't ask for a more responsive design and manufacturing partner! APM's experienced staff can provide design assistance, tooling and fabrication services from concept to production.

APM's technical staff will work with or as your design engineering team to develop a reliable, cost-effective seal which meets your unique application. Our product and manufacturing engineers will create a sealing solution which will address your performance and cost objectives.

Our in house tool designers will fabricate "soft" tooling and provide prototype parts for your evaluation. This step permits fine-tuning of the seal design to minimize component cost and optimize performance. It also eliminates "surprises" upon delivery of production parts.

Upon approval of the prototype parts, our in house tooling engineers will fabricate production molds and economically produce your high quality custom seal.

## CASE STUDY

### Custom tethered connector cap with logo:

- APM was called upon to design a reliable seal that will stay in place for a non-standard connector size / shape.
- Custom connector caps are necessary when a standard cap is not available.
- Provides a reliable seal under the harshest weather conditions and heavy wash-downs that are required in medical and food equipment environments.
- Ensures a tight seal over connector when not in use and tethered to stay put when connector is in use.

### APM design Solution:

A single-piece molded design tethered connector cap with embedded Logo. Specifically designed to provide a water tight seal and hold up to the harshest conditions.
