APM NEWS

APM Hexseal SEELSKREWS secure night vision

Whether operating on the ground, in high altitudes, or under high-pressure submersible conditions, manufacturers know that night vision goggles not only have to be **reliably sealed**, they need to be field-maintenance friendly. That is why leading equipment manufacturers chose **APM's** high pressure self-sealing **SEELSKREW®**. The patented O-Ring embedded design of the SEELSKREW is captured under the head in an asymmetrical groove providing perfect metal-to-metal contact between fixtures. It is reusable, resistant to vibration and won't degrade from exposure to cleaning chemicals, dirt, dust, gas or extreme heat nor arctic temperatures. **APM Hexseal SEELSKREW®** outperforms expectations in even the harshest environments.

DID YOU KNOW?

APM Hexseal gives you options for your sealing operations

The APM line of high-pressure, reusable, self-sealing fasteners includes **self-sealing screws, self-sealing nuts, self-sealing bolts, self-sealing rivets, and self-sealing washers**, all designed with

APM's patented protection to seal in or out: air, water, lubricants and other liquid or gaseous contaminants. Available in imperial and metric sizes with many other options. **APM Hexseal** has the solution to sealing in any environment.

ASK APM

APM Hexseal has the answer to your sealing problem

The APM **SEELSKREW®** is the original self-sealing screw designed and patented by APM. The self-sealing screws are designed to seal out air, water, lubricants and other liquid or gaseous contaminants. They are available in many standard thread sizes and with optional sealing materials. When vibration is an issue, our self-sealing screws can also be supplied with either self-locking pellets, strips or patches, black oxide, painted heads, or in a captivated (**KAPTO-SKREW®**) configuration.
